DESIGNED TO ACCELERATE YOUR IDEAS

ANGELBIRD

Enjoy performance without compromise

Angelbird's Performance Card Reader is built for you – to maximize data transfer and editing efficiency, without interruptions.

- The USB-C 4.0 connectivity delivers wide host compatibility and transfer speeds up to 40 Gb/s.
- The integrated Solid Cool™ technology prevents thermal throttling to ensure smooth, uninterrupted performance – even throughout the highest card capacities.

Stay connected – securely and reliably

The card reader's Solid Connect™ design features a secure, recessed connection point to ensure stable, uninterrupted data transfer while minimizing cable wear and tear.

The USB Solid Flex™ cable delivers an ultra-flexible and durable design for reliable connectivity, effortless handling, and enhanced usability.

Note: This reader is technically compatible with Thunderbolt 3, 4, and 5 host devices, operating via USB 4.0 with transfer speeds of up to 40 Gb/s.

Keep track of your reader's status

The integrated LED indicator on the Performance Card Reader provides real-time feedback, keeping you instantly informed about the device's operating status.

- **Orange LED**: Reader is powered and ready
- **Blue LED:** USB 3.2 connection (up to 20 Gb/s) is active
- **White LED:** USB 4.0 connection (up to 40 Gb/s) is active
- **Flashing LED:** Data transfer in progress
